

School:	ROBERT WARREN JR.
Last Updated:	September 21st, 2016 (BC)
General Info:	The gym is located on the NW side of the school.
Court Lines:	There are 3 smaller courts. Use the 2 outside courts. Each court has yellow sidelines and blue end lines.
Post holes:	Use the post holes that are approximately 6 inches outside each court.
Nets:	The CSSC used to have 2 nets at this school; however 1 of the nets has gone missing. The school has given us permission to use one of their nets. They will be stored in the gym storage room (just outside of the gym) under the main shelving unit in a plastic bin. Our net is a shortened 24 foot VN8080 net with cable on the top and bottom. It has 1 rope attached to the top of the net and 1 rope attached to the opposite bottom corner (this is because the posts do not have ropes on them). The other 2 corners have cable loops.
Posts:	The posts are kept in the gym storage room on a post rack. Use the 4 older, light blue posts with no ropes on them . The newer posts are only for the main centre court. For the net height, use the top pulley on the posts.
Step 1	Place one post with the single triangle base on the outside of the court with the cranks facing into the court. Place one of the double triangle base posts in the post hole on the inner part of the gym with the crank facing into the court.
Step 2	Attach the s-hook from the top of the net to the d-ring on the top of the inside post with the double triangle base. Run the rope from the other end of the net over the wheel on the outer post and down to the crank. Attach the rope to the crank and tighten the top of the net.
Step 3	Attach the s-hook from the bottom of the net to the lower d-ring on the outer post.
Step 3	Run the bottom rope at the other end of the net through the lower d-ring and down to the lower crank on the middle post. Attach the rope to the crank and tighten the bottom of the net. (Do not over tighten or the net will be pulled down).
Step 4	Repeat for the other court.
